## IMPORTANT — Read Carefully

### INSTRUCTIONS FOR ORDERING **CASE** PARTS

**DO NOT FAIL** to order by correct Part Number.

**ORDER EARLY**—Do not delay ordering until you are about to use the parts.

Orders should plainly specify: Quantity, Number and Description of Part, Post Office Address, Shipping Station, County and State, Manner of Shipment—Parcel Post, Express or Freight. Sign all orders plainly.

If unable to locate number of part to be replaced or if uncertain as to the correct number, send old part to Branch as a sample, transportation charges prepaid, and marked plainly with your name and address so that it may be readily identified.

If it is not practical to send old part to Branch, be sure to give a good description of it and also give the numbers of some of the principal cast parts on the same machine; this will help to identify part.

# INFORMATION

To make it as simple as possible to locate the number of the parts to be replaced, the parts catalog is divided into sections or groups. Use the index to locate the group in which you would suppose the part would be listed. The numerical index at rear of catalog will indicate the page on which part number is described.

Look for the number on the old part and notice if the printed description of the number conforms to the part to be replaced.

Figures in the year column indicate the years machines were built using the part.

When the two last numerals of the year are shown (example 43) it signifies that the part was still being used on machines being built when this list was published and that it was adopted in the year mentioned.

When the year is shown in full (example 1946) it signifies that the part is not used on the present machines but was in use on machines built that year only.

The last two figures of different years (41-45) designates that the part was adopted on machines built during the first mentioned year but was discontinued on machines built after the second year shown.

Each letter of the key word represents a numeral as follows:

I	N	F	O	R	M	C	A	S	E
1	2	3	4	5	6	7	8	9	0

The letter Y is used to separate the code letters from the prefix and the suffix letters of the part number, Letter Z indicates  $\frac{1}{2}$ .

Example: To code the following numbers:

H860	H is the prefix letter of the part number, Y is the separating letter.
HYAME	A=8, M=6, E=0.
H1272S	H is the prefix letter of the part number; Y is the separating letter.
HYINCNYS	I=1, N=2, C=7, N=2. Y is the separating letter and S is the suffix letter.

A code word of not more than five letters will be accepted and charged for as one word by the telegraph companies, over five letters and not more than ten will be rated as two words.

Prepay all telegrams.

## UTILITY CODE

Apjaa	Ship on first car.	Cloba	Parcel post special delivery.
Atpda	Not in stock.	Ctrda	Mail our dealer at.....
Bibga	If not in stock, wire Factory to ship.	Ctsea	Mark dealer order number on shipping tags and invoices.
Bifka	Freight.....at.....charge us.	Ctufa	Truck open our dealer at.....
Bigla	Express.....charge us.	Hanba	We have your telegram.
Bjdba	Mail.....charge us.	Haoca	We have your letter.
Bjgea	Mail open account.	Hapda	See our letter.
Bkdba	Add charges.	Harea	See our telegram.
Bkga	Express our dealer at.....	Hasia	Advise us by wire.
Bnlba	Freight our dealer at.....	Hatga	Advise us by mail.
Crise	Wire, if for any reason immediate shipment cannot be made.	Hdkya	See your letter.
Camza	Charge through account of dealer at.....	Hdlza	See your telegram.
